

INDEX

Note: Page numbers of article titles are in **boldface** type.

- Acupuncture, for back problems, **211–221**
 - approaches to, 212–214
 - areas to be needled in, 215–216
 - back pain, 216–220
 - complications, 214
 - diffuse myofascial syndrome, 220
 - precautions in, 214
- Articular process(es), anatomy of, 19–20
- Articular process degeneration,
 - spondylosis and, management, 186
- Articular process degenerative joint disease, pathology of, 108
- Articular process–synovial intervertebral articulation complex, ultrasonographic evaluation, 136–142
- Articulation(s), neuropathology of, 199–200
 - pathophysiology, 198–199
- Back, dermatological conditions of,
 - management, 179–181
 - hyperesthesia of, 180–181
 - management, physical therapy, **223–246**.
 See also *Physical therapy, for back problems*.
 - measuring of, for tack fit, 259–261
 - muscles of, pathophysiology, 200
 - neuroanatomy of, **71–83**
 - problems related to. See *Back pain; Back problems*.
 - rick of, test for, 4
- Back lesions, articular process–synovial intervertebral articulation complex, ultrasonographic evaluation, 136–142
 - evaluation, ultrasonographic, **131–159**
 - general considerations in, 131–132
 - lumbosacral junction, ultrasonographic evaluation, 142–156
 - spinous processes, ultrasonographic evaluation, 132–136
 - supraspinous ligament processes, ultrasonographic evaluation, 132–136
 - transverse processes, ultrasonographic evaluation, 142
- Back pain, causes, secondary, 192–193
 - chronic, acupuncture for, 216–220
 - history of, 62–64
 - inability to define, 5–6
 - management, medical, **179–194**
 - neurological disorders and, management, 191
 - osseous disorders and, management, 184–190
 - physical examination for, **61–70**
 - at rest, 64–66
 - at work, 67–68
 - in-hand, 67–68
 - longeing, 68
 - under-saddle, 68
 - diagnostic tests, 69–70
 - neurological examination, 68–69
 - soft tissue disorders and, management, 179–184
 - thermographic diagnostics in, **161–177**
 - equipment for, 168–169
 - indications, 163–168
 - infrared thermographic imaging studies in, 171–173
 - interpretation of, 169–173
 - normal thermal profile parameters in, 169–170
 - physiology of, 170–171
 - procedures, 168–169
 - prognostic value of, 174
- Back problems, chiropractic evaluation and management, **195–209**
 - complications, 204–205
 - conditions not treated by, 204
 - human chiropractic research, 200
 - indications, 201
 - practitioners in, 201–202
 - principles of, 196
 - prognosis, 207
 - techniques, 205–207
 - clinical history of, importance of, 9–10

Back problems (*Continued*)

- clinical indications, 8–9
- diagnosis, 10, 11
- evaluation, limiting factors in, 5–8
 - differences of opinion, 7
 - difficulties of palpating anatomical structures involved, 6
 - inability to define back pain, 5–6
 - lack of specific clinical signs, 6
 - spontaneous recovery, 7–8
- historical perspective on, 1–12
- imaging techniques clinical findings, and prognosis, correlation between, 126–127
- in human medicine, 196–197
- joint manipulation for, physiology of, 197–198
- management, acupuncture, 211–221. See also *Acupuncture, for back problems*.
- prognosis, 261
- radiology of, 113–122
 - findings, 115–122
 - techniques, 114–115
- rehabilitation for, 263–280. See also *Rehabilitation, for back problems*.
- scintigraphy of, 122–126
 - findings, 123–126
- Blanketing, in rehabilitation for back problems, 269
- Bone(s), therapeutic ultrasound of, 237
- Bridle(s), fit of, 249–250

Cage walkers, in rehabilitation for back problems, 241, 242

- Caudal vertebrae, management, 190
- Cervical flexion, displacements due to, 36
- Cervical vertebral malformation, management, 191
- Chiropractic evaluation, for back problems, 195–209. See also *Back problems, chiropractic evaluation and management*.
- Cold, in rehabilitation for back problems, 277
- Congenital spinal malformations, pathology of, 103–104
- Cramping, muscle, ear tick-associated, management, 191
- Cutaneous innervation, 76

Degenerative spinal disorders, pathology of, 106–110

- Dermatophytosis, management, 180
- Detergent sensitivity, management, 179
- Diffuse myofascial syndrome, acupuncture for, 220

- Dorsal spinous processes, impingement of, management, 184–186
- Dorsoventral mobility, and morphology, relationship between, 36–38

Ear tick-associated muscle cramping, management, 191

- Electromagnets, for back problems, 231
- Equine motor neuron disease, management, 191
- Exercise(s), in-hand, in rehabilitation for back problems, 271–276
 - under-saddle, in rehabilitation for back problems, 271–276

Fistulous withers, pathology of, 104

- Fracture(s), of sacrum, management, 190
 - spinal, pathology of, 106
 - stress, of ilium, management, 186–187
 - pelvic, pathology of, 106
 - vertebral, management, 189
 - vertebral lamina, pathology of, 106
 - vertebral body, management, 189–190

Gait, hind limb, dysfunction of, differential diagnosis, 84

- Gluteal muscle, middle, biopsy of, 89

Healing, phases of, 225

- Heat, in rehabilitation for back problems, 277
- Hind limb gait dysfunction, differential diagnosis, 84
- Hollow-backed horse, 2
- Hot walkers, in rehabilitation for back problems, 268
- Hunter's bump, management, 187
- Hyperesthesia, of back, management, 180–181

Ilium, stress fractures of, management, 186–187

- Infection(s), spinal, pathology of, 104
- Infrared thermographic imaging (ITI) studies, in back pain, 171–173
- Intervertebral disk, anatomy of, 16–17

Joint(s). See also specific types.

lumbosacral, biomechanics of, 49–54
sacroiliac, anatomy of, 21
Joint manipulation, physiology of, 197–198
Jumper's bump, management, 187

Kidney dropper, 4
"Kissing spines," management, 184–186

Lameness, coexisting, management, 192–193
compensatory, correction of, in rehabilitation for back problems, 266–267

Laser(s), for back problems, 239–240

Lateroflexion, and rotation, 39–40
defined, 39

Lesion(s), neurological, localization of, 76–83. See also *Neurological lesions*, *localization of*.
osseous, pathology of, 103–112. See also *Osseous lesions*.

Ligament(s), spinal, anatomy of, 21–22
pathology of, 97–101

Long reins, in rehabilitation for back problems, 242, 243

Longeing, in physical examination for back pain, 68
in rehabilitation for back problems, 268

Longissimus muscle, biopsy of, 88

Lumbar dorsal spinous process, fracture of, management, 189

Lumbar intertransverse joint degenerative joint disease, pathology of, 108–109

Lumbosacral joint, biomechanics of, 49–54
dorsoventral movements of, 49–54
injury of, management, 188–189
lateroflexion and rotation of, 54

Lumbosacral junction, ultrasonographic evaluation, 142–156

Magnet(s), static, for back problems, 231
Magnetic field therapy, for back problems, 230–232
contraindications, 232
electromagnets, 231
indications, 232
magnetism, 230–231
pulsed electromagnetic fields
technique, 231–232
static magnets, 231

Magnetism, for back problems, 230–231

Massage, for back problems, 225–230
in rehabilitation for back problems, 276–277

Middle gluteal muscle, biopsy of, 89

Motor innervation, evaluation, 77–81

Motor neuron disease, management, 191

Mouth, comfort associated with, in rehabilitation for back problems, 267

Muscle(s). See also specific type, e.g., *Spinal muscle*.

back, pathophysiology, 200

spinal, extrinsic, anatomy of, 23–24

intrinsic, anatomy of, 22–23

pathology of, 87–96

Muscle cramping, ear tick-associated, management, 191

Muscle stimulators, for back problems, 232–234

Musculoskeletal system tissues, damage of, physical therapy for, 224

Myelitis, protozoal, management, 191

Myogenic atrophy, pathology of, 94

Myopathy(ies), polysaccharide storage, muscle pathology associated with, 91–92

Myositis, immune-mediated, pathology of, 94, 95

nonmetabolic, management, 182–183

Neck, natural orientation of, 33–36

Neurogenic atrophy, evaluation, 77–81
pathology of, 92–94

Neurological disorders, management, 191

Neurological examination, in physical examination for back pain, 68–69

Neurological lesions, localization of, 76–83
evaluation of motor innervation and neurogenic atrophy, 77–81

evaluation of pain and touch

sensation, 81–82

evaluation of proprioception, 82

upper motor neuron vs. lower motor neuron concepts and reflex testing, 82–83

Neurologically based dysfunction, determination of diagnostic tools in, 84

Nodule(s), on back, management, 179–180

Nuclear medicine scanning, of back problems, 122–123

Osseous disorders, management, 184–190

Osseous lesions, pathology of, 103–112
congenital spinal malformations, 103–104

spinal infections, 104

traumatic spinal disorders, 105–106

Osteomyelitis, vertebral, pathology of, 104

Pain, back. See *Back pain*.

Pain (*Continued*)

- evaluation, 81–82
- Paraspinal muscle injuries, management, 181–182
- Pelvic stress fractures, pathology of, 106
- Physical therapy, for back problems, 223–246
 - historical perspective, 224
 - lasers, 239–240
 - magnetic field therapy, 230–232
 - massage, 225–230
 - muscle stimulators, 232–234
 - musculoskeletal system tissue damage, 224
 - rehabilitation, 240–243
 - TENS, 234–236
 - ultrasound, 236–239
- Physiotherapy, described, 225
- Polysaccharide storage myopathy, muscle pathology associated with, 91–92
- Ponying, in rehabilitation for back problems, 268
- Proprioception, evaluation, 82
- Pulsed electromagnetic fields, for back problems, 231
- Pulsed electromagnetic fields technique, 231–232
- Rehabilitation, for back problems, 240–243, 263–280
 - adverse training in, 268
 - blanketing in, 269
 - cage walkers in, 241, 242
 - cold therapy, 277
 - Downs House observations in, 243
 - for correction of lameness, 266–267
 - ground and riding rehabilitative exercises in, 274
 - heat therapy, 277
 - hot walkers in, 268
 - in-hand exercises in, 271–276
 - long reins in, 242, 243
 - longeing in, 268
 - maintenance factors in, 268
 - management factors in, 263–269
 - massage, 276–277
 - modalities of, 276–277
 - mouth comfort in, 267
 - muscle and posture rehabilitative exercises in, 272–273
 - ponying in, 268
 - posture correction in, 271–272
 - prognosis, 277–279
 - retraining in, 276
 - shoeing in, 263–266
 - stretching in, 269–271
 - swimming in, 241, 269
 - teeth comfort in, 267
 - training devices in, 266
 - training in, 276
 - treadmill in, 241
 - TTEAM in, 274–276
 - turnout in, 266
 - under-saddle exercises in, 271–276
 - weights in, 242
 - working surfaces in, 267
- Rhabdomyolysis, acute, muscle pathology associated with, 90–91
 - recurrent exertional, muscle pathology associated with, 91
- Rider(s), effect on horse, 250–251
- Roach-backed horse, 3
- Rotation, lateroflexion and, 39–40
- Sacral syndrome, management, 190
- Sacrocaudalis dorsalis muscle, biopsy of, 88–89
- Sacroiliac joint, anatomy of, 21
 - injury of, management, 187–188
- Sacroiliac joint degenerative joint disease, pathology of, 109–110
- Sacroiliac region, pain involving, management, 186
- Sacrum, fractures of, management, 190
- Saddle(s), evaluation of, 252–253
 - with rider, 256–257
 - without rider, 253–256
 - fit of, 251–258
 - problems related to, 251–252
 - variables in, 257–258
- Saddle pads, fit of, 258–259
- Saddle trauma, management, 181
- Scintigraphy, of back problems, 122–126
- Segmental thoracolumbar intervertebral biomechanics, 41–49
 - anatomical functional analysis of dorso-ventral movements, 43–44
 - anatomical functional behavior of thoracolumbar vertebral structures during dorsoventral movements, 44–45
 - applied features, 46–47
 - dorsoventral movements, 42–47
 - kinematic analysis, 42–43
 - rotation and lateroflexion, 47–49
- Serapin, for back problems, 213
- Shoeing, in rehabilitation for back problems, 263–266
- Soft tissue disorders, management, 179–184
- Spinal cord segments, relationships with respective vertebrae, 71–73
- Spinal disorders, degenerative, pathology of, 106–110
 - traumatic, pathology of, 105–106
- Spinal ligaments, anatomy of, 21–22
 - pathology of, 97–101

- Spinal malformations, congenital,
 - pathology of, 103–104
- Spinal muscle. See also specific type, e.g., *Longissimus muscle*.
 - atrophy of, pathology of, 92–95
 - biopsy of, technique, 87–89
 - extrinsic, anatomy of, 23–24
 - histochemistry of, 89
 - intrinsic, anatomy of, 22–23
 - pathology of, 87–96
 - painful epaxial muscles-related, 90–92
 - specimen of, preparation of, 89
- Spinal segmental dysfunction,
 - pathophysiology, 198
- Spine, biomechanics of, 27–60
 - in vitro studies, 30–54
 - in vivo studies, 28–30
 - functional anatomy of, 36–40
 - infections of, pathology of, 104
 - kinematic studies of, 30–33
 - “kissing,” management, 184–186
 - regional mobility of, in vitro studies, 33–36
- Spinous processes, anatomy of, 18–19
 - impingement of, pathology of, 107–108
 - ultrasonographic evaluation, 132–136
- Spondylitis, pathology of, 104
- Spondylosis, management, 186
 - pathology of, 106–107
- Static magnets, for back problems, 231
- Stress fractures, of ilium, management, 186–187
 - pelvic, pathology of, 106
 - vertebral, management, 189
 - vertebral lamina, pathology of, 106
- Stretching, in rehabilitation for back problems, 269–271
- Supraspinous ligament injury,
 - management, 183–184
- Supraspinous ligament processes,
 - ultrasonographic evaluation, 132–136
- Swimming, in rehabilitation for back problems, 241, 269
- Tack fit, 247–261
 - bridles, 249–250
 - correct, 247–248
 - incorrect, 248–249
 - measuring back for, 259–261
 - saddle pads, 258–259
 - saddles, 251–258. See also under *Saddle(s)*.
- Teeth, comfort associated with, in
 - rehabilitation for back problems, 267
- Tellington Touch Equine Awareness Movements (TTEAM), in
 - rehabilitation for back problems, 274–276
- TENS. See *Transcutaneous electrical nerve stimulation*.
- Thoracolumbar displacements, cervical
 - flexion and, 38
- Thoracolumbar mobility, natural
 - orientation of, 33–36
 - when neck is lowered, modification of, 36
- Thoracolumbar vertebral region, anatomy
 - of, 13–26
 - articular processes, 19–20
 - extrinsic spinal muscles, 23–24
 - intervertebral disk, 16–17
 - sacroiliac joint, 21
 - spinal ligaments, 21–22
 - spinal processes, 18–19
 - transverse processes, 20–21
 - vertebral arch, 17
 - vertebral body, 16
 - vertebral canal contents, 18
 - vertebral column, 13–14
 - vertebral motion segment, 14–16
- Thoracolumbosacral vertebral column,
 - innervation of, 73–75
- Touch sensation, evaluation, 81–82
- Training devices, in rehabilitation for back problems, 266
- Transcutaneous electrical nerve stimulation (TENS), for back problems, 234–236
 - contraindications, 236
 - indications, 235–236
 - technique, 235
- Transverse processes, anatomy of, 20–21
 - ultrasonographic evaluation, 142
- Trauma, saddle, management, 181
- Treadmill, in rehabilitation for back problems, 241
- Trophic stimulation, for back problems, 232–233
- TTEAM. See *Tellington Touch Equine Awareness Movements*.
- Tubera sacrale, asymmetry of,
 - management, 187
- Turnout, in rehabilitation for back problems, 266
- Ultrasonography, of back lesions, 131–159
 - therapeutic, adverse effects, 236–237
 - for back problems, 236–239
 - in wound healing, 237
 - indications, 239
 - machines in, 238
 - of bone, 237
 - technique, 238–239
 - tissue effects, 237
- Vertebral arch, anatomy of, 17

- Vertebral body, anatomy of, 16
 - fractures of, management, 189–190
- Vertebral canal, contents of, anatomy of, 18
- Vertebral column, anatomy of, 13–14
- Vertebral lamina stress fractures,
 - pathology of, 106
- Vertebral motion segment, anatomy of,
 - 14–16
- Vertebral osteomyelitis, pathology of, 104
- Vertebral stress fractures, management, 189
- Weights, in rehabilitation for back problems, 242
- White hairs, management, 179
- Withers, fistulous, pathology of, 104
- Wobbler syndrome, management,
 - 191
- Working surfaces, in rehabilitation for back problems, 267
- Wound healing, therapeutic ultrasound in,
 - 237
